Tuiles jumelles

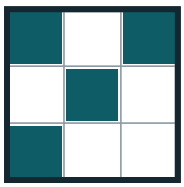

CP | 2026-11-02 | Fiche

Chaque tuile est une petite grille de cases. Une case peut être vide, foncée ou porter un point orange. Compare case par case et trouve la tuile qui est vraiment identique. Chaque exercice n’a qu’une seule bonne réponse.

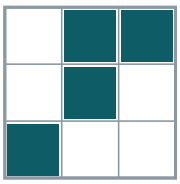

Entoure la jumelle exacte du modèle. Dans les autres, une case foncée a glissé dans la case voisine.

Tuiles jumelles

CP | 2026-11-02 | Corrigé

Les anneaux orange indiquent les réponses. Les cadres rouges signalent les cases qui rendent chaque mauvaise tuile différente du modèle.
