Tessere gemelle

2ª media | 2026-11-02 | Scheda

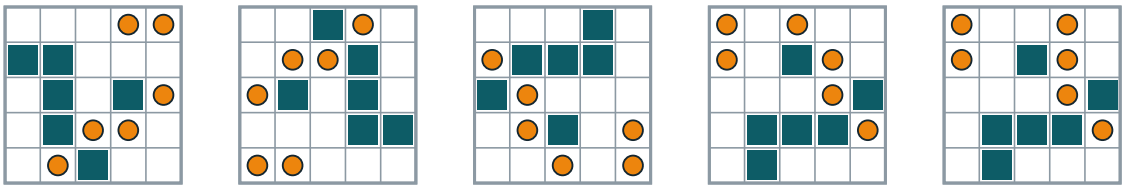

Ogni tessera è una piccola griglia di quadretti. Un quadretto può essere vuoto, scuro o avere un pallino arancione. Confronta un quadretto alla volta e trova la tessera davvero identica. Ogni esercizio ha una sola risposta giusta.

Quattro tessere sono la stessa tessera ruotata in modi diversi. Una è l'intrusa: è stata capovolta oppure ha due quadretti scambiati. Cerchiala.

L’anello arancione indica l’intrusa. La nota rossa spiega perché: capovolta = immagine allo specchio delle altre, scambiata = due quadretti si sono scambiati di posto.
