Tessere gemelle

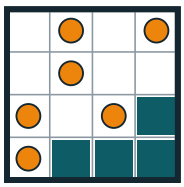

3ª primaria | 2026-11-02 | Scheda

Ogni tessera è una piccola griglia di quadretti. Un quadretto può essere vuoto, scuro o avere un pallino arancione. Confronta un quadretto alla volta e trova la tessera davvero identica. Ogni esercizio ha una sola risposta giusta.

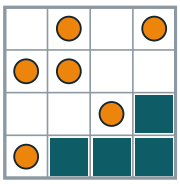

Controlla il modello riga per riga. Solo una tessera coincide quadretto per quadretto; nelle altre, due quadretti vicini si sono scambiati di posto.

Tessere gemelle

3ª primaria | 2026-11-02 | Soluzioni

Gli anelli arancioni indicano le risposte. Le cornici rosse segnano i quadretti che rendono ogni tessera sbagliata diversa dal modello.
