Paper Folding

Kindergarten | 2026-11-18 | Worksheet

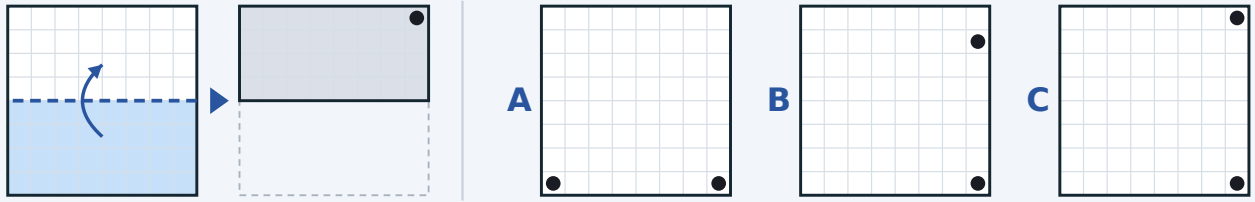

An adult can read this aloud. The paper is folded on the dashed line: the blue half goes over the other half. Then a hole is punched through all the layers. Which picture shows the paper when it is opened again?

The hole goes through two layers, so the opened paper has two holes: the hole and its mirror image across the fold.

Paper Folding

Grade 1 | 2026-11-18 | Worksheet

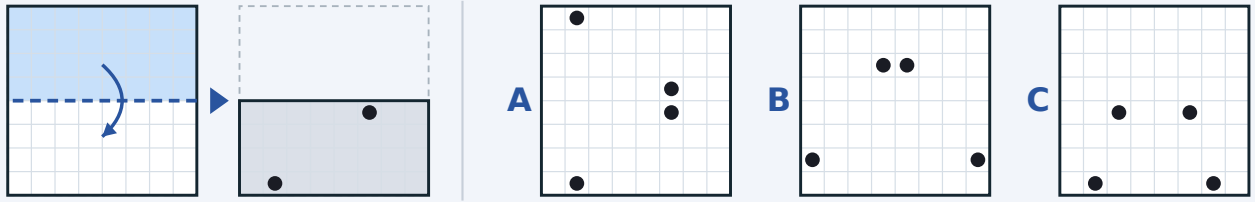

Each sheet is folded in half on the dashed line, once or more, in the order of the pictures; the blue half goes over the other half. Then holes are punched through every layer. Choose the picture of the sheet opened out flat.

Open one fold at a time, starting with the last one. Every fold you open doubles the number of holes.

Paper Folding

Grade 2 | 2026-11-18 | Worksheet

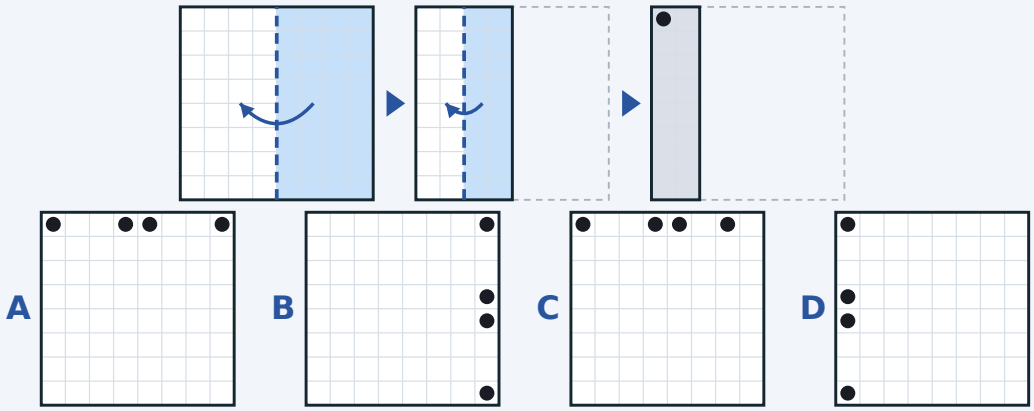

Each sheet is folded in half on the dashed line, once or more, in the order of the pictures; the blue half goes over the other half. Then holes are punched through every layer. Choose the picture of the sheet opened out flat.

Two folds make four layers, so one hole becomes four holes. Open the last fold first.
